ELSEVIER

European Journal of Operational Research 107 (1998) 759–761

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 107

1 A generalized linear programming model for nurse scheduling
B. Jaumard, F. Semet and T. Vovor

19 End-of-life service: A case study
R.H. Teunter and L. Fortuin

35 The 'final order' problem
R.H. Teunter and W.K. Klein Haneveld

45 Privatization of Nippon Telegraph and Telephone: Was it a good policy decision?
T. Sueyoshi

62 Technical efficiency and economies of scale in state owned enterprises: The Hellenic telecommunications organisation
A.D. Athanassopoulos and D. Giokas

76 Improving heuristics for the frequency assignment problem
D.H. Smith, S. Hurley and S.U. Thiel

87 A soft dynamic programming approach for on-line aircraft 4D-trajectory optimization
P. Hagelauer and F. Mora-Camino

96 A mathematical programming viewpoint for solving the ultimate pit problem
R. Underwood and B. Tolwinski

108 An MCDM approach to production analysis: An application to irrigated farms in Southern Spain
J. Berbel and A. Rodriguez-Ocaña

119 An interactive reservoir management system for Lake Kariba
A. Stam, K.A. Salewicz and J.E. Aronson

137 A hybrid inexact-stochastic water management model
G.H. Huang

159 Evaluating environmentally conscious business practices
J. Sarkis

175 Optimal solution of cellular manufacturing system design: Benders' decomposition approach
S.S. Heragu and J.-S. Chen

193 On evaluating the performance of GSS: Furthering the debate
P.N. Finlay

202 Estimating NPV variability for deterministic models
W.J.H. van Groenendaal

214 The greater whole: Towards a synthesis of system dynamics and soft systems methodology
D.C. Lane and R. Oliva

236 The single-vendor single-buyer single-buyer integrated production-inventory model with generalised policy
R.M. Hill

237 OR Software
H. Thiriez

243 Book reviews
H. Fleuren (ed.)

247 Editorial
J. Węglarz and J. Józefowska

250 The resource constrained project scheduling problem with multiple crashable modes: A heuristic procedure
T. Ahn and S.S. Erenguc

260 Heuristics for multimode scheduling problems with dedicated resources
L. Bianco, P. Dell'Olmo and M.G. Speranza
272 A branch and bound algorithm for the resource-constrained project scheduling problem
P. Brucker, S. Knust, A. Schoo and O. Thiele
289 Multi-resource shop scheduling with resource flexibility
S. Dauzère-Pérès, W. Roux and J.B. Lasserre
306 Classical and new heuristics for the open-shop problem: A computational evaluation
C. Guéret and C. Prins
315 Interactive analysis of multiple-criteria project scheduling problems
M. Hapke, A. Jaszkiewicz and R. Słowiński
325 Minimization of the makespan in a two-machine problem under given resource constraints
A. Janiak
338 On a methodology for discrete–continuous scheduling
J. Józefowska and J. Weglarz
354 Local search metaheuristics for discrete–continuous scheduling problems
J. Józefowska, M. Mika, R. Różycki, G. Waligóra and J. Weglarz
371 Minimizing the number of vehicles in periodic scheduling: The non-Euclidean case
V. Kats and E. Levner
378 Two-machine shop scheduling with zero and unit processing times
I.N. Lushchakova and S.A. Kravchenko
389 Branch and bound crossed with GA to solve hybrid flowshops
M.-C. Portmann, A. Vignier, D. Dardilhac and D. Dezalay
401 Distributed scheduling using simple learning machines
F. Seredyński
414 A bicriteria two-machine permutation flowshop problem
F. Sivrikaya-Serifoğlu and G. Ulusoy
431 Multi-mode resource-constrained project scheduling by a simple, general and powerful sequencing algorithm
A. Sprecher and A. Drexl
451 On the optimal management of project risk
L.V. Tavares , J.A.A. Ferreira and J.S. Coelho
470 Pre-processing techniques for resource allocation in the heterogeneous case
V. Valls, M.A. Perez and M.S. Quintanilla
492 Optimization analysis for design and planning of multi-project programs
V.D. Wiley, R.F. Deckro and J.A. Jackson

507 Multi-attribute decision making: A simulation comparison of select methods
S.H. Zanakis, A. Solomon, N. Wishart and S. Dublish
530 A branch and bound algorithm for fixed zero-one multiple objective linear programming
G. Mavrotas and D. Diakoulaki
542 Choosing realistic values of indifference, preference and veto thresholds for use with environmental criteria within ELECTRE
M. Rogers and M. Bruen
552 A new system for weighting environmental criteria for use within ELECTRE III
M. Rogers and M. Bruen
564 An interactive fuzzy satisficing method for multiobjective 0–1 programming problems with fuzzy numbers through genetic algorithms with double strings
M. Sakawa and T. Shibano
575 An interactive fuzzy satisficing method for structured multiobjective linear fractional programs with fuzzy numbers
M. Sakawa and K. Kato
590 An interactive fuzzy satisifcing method for large scale multiobjective 0–1 programming problems with fuzzy parameters through genetic algorithms
K. Kato and M. Sakawa
599 Reference direction interactive method for solving multiobjective fuzzy programming problems
C. Mohan and H.T. Nguyen
614 A tolerance approach to the fuzzy goal programming problems with unbalanced triangular membership function
J.S. Kim and K.-S. Whang
625 An approximate approach of global optimization for polynomial programming problems
H.-L. Li and C.-T. Chang

633 Infeasibility analysis for systems of quadratic convex inequalities
W.T. Obuchowska
644 Lexicographic improvement of the target values in convex goal programming
R. Caballero, L. Rey and F. Ruiz
656 A lexicographic approach to bi-objective loading of a flexible assembly system
T. Sawik
669 On a variant of lexicographic multi-objective programming
J.K. Sankaran
675 Duality in multiobjective nonlinear programming involving semilocally convex and related functions
S.K. Suneja and S. Gupta
686 Multiobjective symmetric duality with cone constraints
D.S. Kim, Y.B. Yun and W.J. Lee
692 Optimal system design with MC^2 linear programming: A dual contingency plan approach
Y. Shi
710 Newton's method for linear inequality systems
M.Ç. Pınar
720 The role of the augmented system in interior point methods
I. Maros and Cs. Mészáros
737 A class of differential games which admits a feedback solution with linear value functions
D.W.K. Yeung
755 Book Reviews
H. Fleuren (ed.)
759 Contents Volume 107
